

CIP 73203 HSIP Cycle 11 – City Wide Safety Improvement Project

ADDENDUM No. 4: Questions and Answers during Bidding Phase

Q6: Sheet 2, General Note 7. What are the guidelines for determining what concrete might need to be replaced? This is a wide-spanning project, and this requirement might potentially mean quite a bit of concrete replacement. Considering this project has an almost purely above-ground scope, would the City consider removing this note?

A: General Note 7 on sheet 2, Project Plans, are referenced to any work that may be required by the City for the Contractor to repair or replace concrete work on curb, gutter, and sidewalk that is deemed damaged or displaced during the course of construction under the work scope of the project specification and contract. This note shall remain on the plans and valid as referenced, herewith.
